Java and XML, 3rd Edition
By: Brett McLaughlin; Justin Edelson
Publisher: O'Reilly Media, Inc.
Pub. Date: 2006/12/08
Insert Date: 2006/02/13
Table of Contents

Chapter Title: Data Binding with JAXB

... references to XML nodes from your code. Instead of working with elements and attributes, your code uses classes named Customer and PurchaseOrder. This first means that you have to define the structure of your XML documents using a schema, typically either an XML Schema or a DTD. To bind this...

Insert Date: 2002/09/26
Table of Contents

Section Title: What Is Data Binding?

... re ready to convert XML documents to Java classes. This process is called unmarshalling in the data binding world. If you forget which way is marshalling and which is unmarshalling, remember that it's XML data binding. Everything starts and ends with XML, so converting to XML is the "normal..."
